## Glover Island Project - Phase I Drill Program

*Complete table of significant drill core sample results*

*\* indicates assay data not previously reported from new holes*

*\*\* indicates updated assay data from new infill sampling*

Hole #	Section	Grid	From	To	Core Width	True Width (m)	Gold g/t

LPSE-12-69	9750W	West	183.0	186.0	3.0	2.6	0.99*
			254.0	260.0	5.0	4.5	1.43*

*Note: sampling returned no significant assays for holes LPSE-11-35, -51,-62 and for holes LPSE-12-70 through -74*

All of the samples were analyzed at Eastern Analytical Laboratory Ltd., in Springdale, Newfoundland. Samples were assayed using lead collection fire assay with AA (atomic absorption) finish. A rigorous quality control program is in place which involves insertion of blanks and multiple grades of standards at regular intervals, as well as submitting quarter splits of core in addition to the regular half split core roughly every 30<sup>th</sup> sample.

### **Mountain Lake Resources Inc.**

Mountain Lake Resources Inc. (TSX-V: MOA) is a diversified junior exploration company, whose corporate strategy is to build shareholder value through the exploration and development of economically viable mineral properties all located on the pro-mining island of Newfoundland. Mountain Lake's current projects include: a 50% interest in the Valentine Lake gold property under the joint venture with Marathon Gold Corp.; a 100% interest in the Glover Island gold exploration property (drilling in progress); an option to earn a 100% interest in the Little River gold-antimony exploration property; a 100% interest in the Bobby's Pond base metals property.
